

## Defoamer Liquid

### Liquid Defoamer Concentrate

---

Defoamer Liquid is a professional anti-foaming liquid which prevents foam from forming in wands and hoses. It is a highly effective silicone complex which is easy and safe to use.

#### BENEFITS

- **High Performance** - Defoamer Liquid provides high performance foam collapse for operator peace-of-mind.
- **Easy to Use** - Simply pour Defoamer solution into the hose of the running extraction cleaner for instant foam collapse. All foam is immediately eliminated in the wand, vacuum pipes and waste tank.
- **Compatible** - Will not affect pH or alter cleaning performance.
- **Protects Machine Components** - Prevents foam from entering and damaging vacuum motors and blowers.
- **Enhances Vacuum Performance** - Foam build-up is a common cause of poor suction performance. Using Defoamer Liquid eliminates this problem at the source.

#### DIRECTIONS for USE

1. Dilute Defoamer liquid 1:4 to 1:10 with clean water.
2. Pour 1 to 2 cups of Defoamer Solution into the hose of running extraction equipment.
3. This process may need to be periodically repeated if foam generation is high.
