

## Blast

### High Performance Alkaline Tile Cleaner

Use **Blast's** cutting edge technology to simplify and boost the effectiveness of your tile and hard surface cleaning operation. Formulated with new nano surfactant chemistry for ultimate penetration and soil release, it provides the professional cleaner with a mildly alkaline cleaning solution which gives dependable results every time.

#### BENEFITS

- **Professional Choice** – if it's grime you're removing, Blast will do it with ease; it's safe to use on all tile, stone, concrete and grout surfaces.
- **Smart Cleaning Power** – Blast employs smart cleaning technology – not brute force – to achieve it's outstanding cleaning performance on a wide range of oily soils, grease, fats and general grime build-ups.
- **Conveniently Versatile** – it's ability to penetrate even tough grime build-ups, it's outstanding free rinsing features and ability to tackle a wide range of differing soil types on varying substrates makes it the product of choice for professional cleaners who need to simplify inventory and increase productivity.
- **Safety First** – Blast is an alkaline detergent but does not contain caustic, making it substantially safer in use and transport.

#### SUBSTRATES

Safe and ideal for use on all man-made tiles, natural stone products, clay products, concrete and grout. Avoid contact with nonferrous metals, plated metals, painted surfaces and flooring which is coated with an acrylic polymer or wax.

Ideal for use anywhere there are dirty tiles, concrete, stone or resilient flooring. Especially good in kitchens, dining areas, malls and large commercial areas. Excellent for the maintenance cleaning of commercial and public areas.

#### HOW TO USE

Always pretest the cleaning solution on the surface to be cleaned to check for any substrate sensitivity to chemicals. Observe all safety directions and read the MSDS before use.

#### DIRECTIONS:

##### Heavy Duty Use:

1. Mix 1 part Blast with 4 to 9 parts water. (Hot water will enhance the chemical action).
2. Apply the solution with a clean mop & bucket, autoscrubber or rotary scrubber solution tank. Apply to a limited area at a time. Do not allow solution to dry.
3. Scrub thoroughly with an applicable nylon scouring floor pad or brush.
4. Allow 10 to 30 minutes dwell time. Re-agitate areas of stubborn soiling.
5. Extract/Pick-up resultant slurry with professional tile extraction equipment and rinse thoroughly with clear water.

#### Maintenance:

1. Mix 1 part Blast with 50 to 100 parts water.
  2. Follow standard cleaning techniques. No clear water rinse is needed when using at 1:100.
- Ideal for use through autoscrubbers and similar cleaning equipment.
