

Blast Away

Advanced Tile & Grout Restoration Cleaner

Blast Away is a proprietary restoration cleaner for neglected, black grout lines and tiles. Blast Away's low pH formula contains no hydrochloric, hydrofluoric, phosphoric or sulphamic acids, but is more powerful and effective, yet safer and pleasant to use. Blast Away makes quick work of mineral scale, cement/grout smear, efflorescence, soap scum and embedded stains. It provides tough action on general grime and is excellent for grout restoration ahead of applying a sealant.

BENEFITS

- **Restoration Power** – Blast Away has the muscle to tackle years of efflorescence, mineral scale and alkaline detergent build-up. Speciality penetrating agents ensure quick and effective action saving you time and effort.
- **Grout Specialist** – overcomes stubborn grout stains, embedded soils and cement/grout smear. Always use Blast Away to prepare grout ahead of applying grout sealer.
- **A Total Solution** – unparalleled cleaning punch, yet safe to use and noncorrosive on nonferrous metals (eg Aluminium) when used as recommended.

SUBSTRATES

Safe on all man-made tiles, use with care on sandstone, quarry tiles, terracotta and slate. Not recommended for use on acid sensitive surfaces including marble, limestone, granite and other natural stone. Although unlikely to mark nonferrous metals (e.g. Aluminium), always pre-test before use.

WHERE TO USE

Anywhere there are dirty tiles. Especially good in restoration applications and washrooms, showers and pool surrounds, grout smear removal and builders cleans.

HOW TO USE

Always pre-test on the surface to be cleaned to check for any substrate instability or incompatibility with Blast Away. Observe all safety directions. Read and understand the SDS before use.

DIRECTIONS:

Mineral scale build-up, efflorescence, cement residues and heavy duty applications:

1. Mix 1 part Blast Away with 10 to 30 parts water (100-30ml/Litre) Apply with a clean mop and bucket, rotary scrubber or auto-scrubber. Apply only to a limited area at a time. Do not allow solution to dry.
2. Scrub thoroughly with applicable nylon scouring/floor pad or brush
3. Allow 10 to 30 minutes reaction time and re-agitate
4. Extract/pick-up resultant slurry with extraction equipment
5. Neutralize remaining residues by rinsing thoroughly with a 1:300 solution (300ml/10Lt) of Blast or Neutro Blast.

Grout residues and light duty applications:

1. Mix 1 part Blast Away with 80 to 100 parts water (10-12ml/Litre) Apply with a clean mop and bucket, rotary scrubber or auto-scrubber. Apply only to a limited area at a time. Do not allow solution to dry. Apply solution with a mop and bucket, auto scrubber or pressure washer.
2. Scrub thoroughly with applicable nylon scouring/floor pad or brush
3. Allow 10 to 30 minutes reaction time and re-agitate
4. Rinse well with clean water.
