

Strike

Super Strength Prespray Detergent

Strike is a super concentrated prespray powder with powerful enzyme cleaning action for tackling tough organic and greasy soiling. Strike employs a well buffered alkaline salt blend combined with powerful solvents, surfactants, emulsifiers and sophisticated enzymes to break through tough soil build-ups in restaurants, rentals and schools. Rinses freely to leave the carpet chemical free.

BENEFITS

- **Powerful Cleaning Action** – Strike comprises of powerful alkaline salts and a tough surfactant / solvent blend for breaking through heavy oily greasy soiling.
- **Enzyme Power** – Specialist enzyme technology has been chosen to withstand the high temperatures involved in carpet cleaning and to provide maximum action on organic soils, proteins, starches and oily/fatty soils.
- **Cost Saving Cleaning** – The high concentration of Strike enables it to be used at very economical dilution ratios, providing an ideal cost saving option for cleaning large areas of synthetic carpets such as schools and community facilities.
- **Quick Dissolving** – Strike dissolves quickly and totally in hot or warm water.
- **Safety First** – Strike has a low VOC profile which means no unwanted, unpleasant vapours.
- **A Pleasure to Use** – Strike has been designed for easy use through pump-up or hydroforce sprayers and fragrances the area with a fresh clean scent.

DIRECTIONS for USE

Always pre-test in an inconspicuous location for substrate sensitivity to chemicals.
Do not use on upholstery, natural, wool or stain resistant (5th generation) carpeting.

Dilutions:

- **Pump-up Sprayer**
Add 10 - 15 grams per litre of water (1:100 – 1:64) depending on soil conditions.
- **Hydroforce High Pressure Model**
1:9 tip (Yellow): Add 200 grams to 360 grams per 5Lt hot water and mix until dissolved before pouring into hydroforce.

Application:

1. Always prepare the carpet to be cleaned with thorough vacuuming.
2. Prespray the Strike solution onto the carpet. Do not allow to dry.
3. Agitate & allow 5-10 minutes dwell time.
4. Extract rinse using Liquid Emulsifier or Eureka. Extract rinse using Settler if you intend applying a protector to the carpet.
5. Assist drying with air movers or similar if atmospheric conditions are humid.
